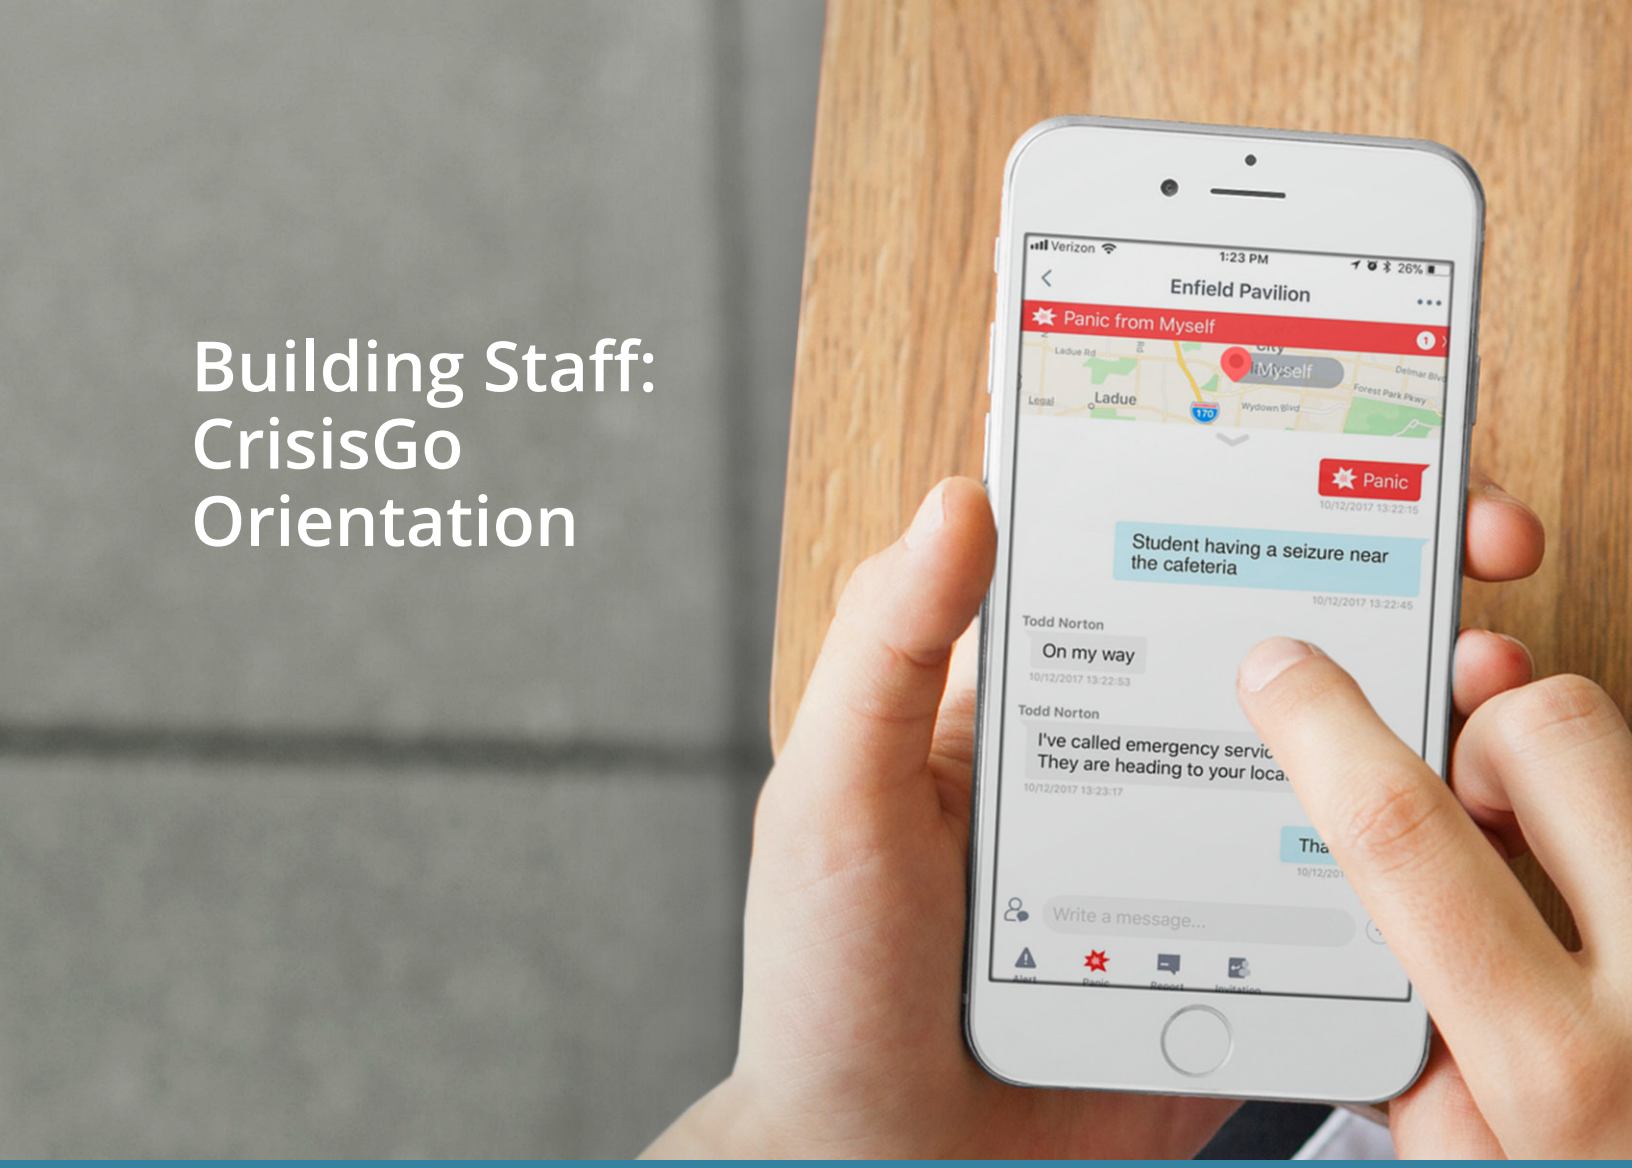
Building Staff: CrisisGo Orientation



CrisisGo's comprehensive safety platform improves school safety, reduces safety risks, increases the peace of mind of your staff and students, and ultimately saves lives.

Safety Starts With YOU. Our goal is to empower you to keep yourself and others safe. Critical situations today happen so quickly that the old methods of communication and coordination are much less effective. This orientation will explain how to activate your account and use the tools and content required to respond to a critical situation. Remember, you are a team, working together for the safety of all. **You're** a link to everyone's safety.
